

Neem & Castile Garden Spray

An all-natural protective spray for plants

Ingredients

- 1 quart distilled water
- 3 tablespoons Neem Oil
- 1 tablespoon Liquid Castile Soap
- 1 teaspoon Apple Cider Vinegar

Directions:

1. Combine neem oil, castile soap, and vinegar in a small bowl and whisk until smooth.
2. Combine mixture with water in quart sized jar or 32 ounce spray bottle.

Usage & Packaging

- To use, shake well, then spray directly on leaves and foliage of garden plants. Discontinue use if discoloration or permanent spotting appears. Re-apply as needed.
- This recipe is best used right away, but can be stored in the refrigerator for up to two weeks, if necessary.
- Our 16 Ounce PET Boston Round with Sprayer makes a great storage and use solution for this recipe, but any standard spray bottle should do.

Notes

- This recipe is made for personal use, but can also be used as inspiration for more serious formulators. Just keep in mind that labeling laws in the United States are very strict when it comes to making and selling anything related to pesticide. Be sure to do your homework before developing anything that is intended for sale.
