

Mineral Makeup Cream Highlighter

a shimmering highlighter cream

Ingredients

- 20 grams clear jojoba oil
- 20 grams virgin coconut oil
- 10 grams candelilla wax
- 2 grams copper glow mica or golden glow mica
- 2 grams superfine silk powder

Makes about five 0.3 ounce tubes

Directions:

1. Combine candelilla wax and coconut oil in double boiler and heat until fully melted.
2. In a small bowl, combine jojoba with mica and silk powder. Whisk until fully blended to form a slurry.
3. Add slurry to double boiler and whisk until smooth.
4. Remove mixture from heat and allow to cool for several minutes at room temperature. The goal is to cool the mixture as much as possible without allowing it to become too hard to pour.
5. Scrape sides and mix to re-melt any hardened mixture, give mixture one last good stir to disperse the mica, then pour into paperboard tubes.
6. Allow tubes to cool and harden completely before handling.

Usage & Packaging:

- Our mineral makeup cream highlighter looks great in our 0.3 Ounce Paperboard Tubes. You can also package this recipe in Lip Balm Tubes or in 1/4 Ounce Dome Jars.
- To use, apply a small amount of highlighter to skin either directly from the tube or with a makeup applicator. Follow contour lines to accentuate facial features along with a bronzer or darker shade of foundation. Blend well.
