

# Mango Papaya Body Lotion

a light and fragrant all-over moisturizer

## Ingredients

- 185 ml Distilled Water
- 7.5 ml Caprylic Capric Triglycerides (MCT Oil)
- 30 ml Papaya Seed Oil
- 3 grams Mango Butter, Refined
- 3 grams Organic Virgin Coconut Oil
- 10 grams Emulsifying Wax (Vegetable)
- 4 grams Triple Pressed Stearic Acid
- 1/16 fl oz Plant-Based Pina Colada Fragrance Oil
- 1/16 fl oz Plant-Based Grapefruit Splash Fragrance Oil
- 2 grams Sun Gold Mica Powder, optional
- 2 grams Tangerine Mica Powder, optional

Makes about two 4-ounce (120 ml) jars

## Directions:

1. In two separate mixing cups, pre-mix mica powders with  $\frac{1}{2}$  teaspoon of MCT oil each and blend into a slurry. (This will help to distribute the mica evenly throughout the lotion.)
2. In a double-boiler, combine the Mango Butter, Organic Virgin Coconut Oil, Papaya Seed Oil, Emulsifying Wax, Stearic Acid and any remaining MCT Oil until fully melted. (If you are using a microwave for this phase, heat in 30-second intervals until the ingredients have fully melted and about 160° F.)
3. Place distilled water in a heat-safe container and heat to 160° F. Set aside to cool.
4. Check the temperature of both the water and oil portions of the recipe to make sure they are both within 150°-160°.
5. Slowly drizzle water portion into oils portion while whisking continuously. Continue to mix with stick blender for 2-3 minutes, ensuring both phases are fully emulsified. If mixing by hand, whisk continuously for 3-5 minutes.
6. Divide the mixture into two separate mixing bowls.
7. In one bowl, add your Plant-Based Pina Colada fragrance oil and your pre-mixed Sun Gold Mica Powder slurry. Blend very well to make sure the mica is evenly dispersed.
8. In the second bowl, add your Plant-Based Grapefruit Splash fragrance oil and your pre-mixed Tangerine Mica Powder slurry. Blend very well to make sure the mica is evenly dispersed.
9. Distribute the lotions into containers, alternating batches to create layers of color and scent. The lotion will become thicker as they cool. Allow lotions to reach room temperature before placing caps on jars.

# Mango Papaya Body Lotion

a light and fragrant all-over moisturizer

## Usage & Packaging:

- We packaged our Mango Papaya Body Lotion in our 4-ounce Flint Glass Jars. They would also look gorgeous in our 4-ounce PET Jars.
- To use, apply a generous dollop of lotion to dry skin and massage gently until absorbed.
- This formula does not contain a preservative and should be stored and handled accordingly. As-is, you can expect your lotion to remain fresh for several days at most. Storing it in the refrigerator and handling it indirectly with clean tools or by using a squeeze bottle or pump, can help extend the shelf life up to one or two weeks. In order to give the formulation a longer shelf life or make it suitable for sale, a preservative would be needed.
- If you wish to add a preservative, we recommend our Lactobacillus Ferment, Water Soluble Preservative along with our LactoCoconut Extract, Water Soluble Preservative. This is a great starting point, but please keep in mind that any formula intended for sale or commercial use should be professionally challenge tested.
